

The landscape of diabetes management is consistently changing. We’ve compiled a few resources to provide updated guidance on diabetes management and tips for achieving target blood glucose values, information on Medicare waivers, as well as digital tools to connect with your patient virtually.

“Practical Recommendations for the Management of Diabetes in Patients with COVID-19”

In this article from The Lancet, an international panel of experts in the field of diabetes and endocrinology virtually convened to provide guidance and practical tips for diabetes management during the pandemic, and discussed potential links between diabetes and COVID-19.

One Key Takeaway

It’s important for people with diabetes who have not yet been infected to control their blood sugar, blood pressure, and lipids to assist in the prevention of COVID-19.
